

Project Title: Hound-Dogs

Who: Lucas Sward, Xi Gao, Fernando Mercado, Chad Ribisi, Mahalia Evans

Project Tracker: Trello

<https://trello.com/b/fvgW5kAd>

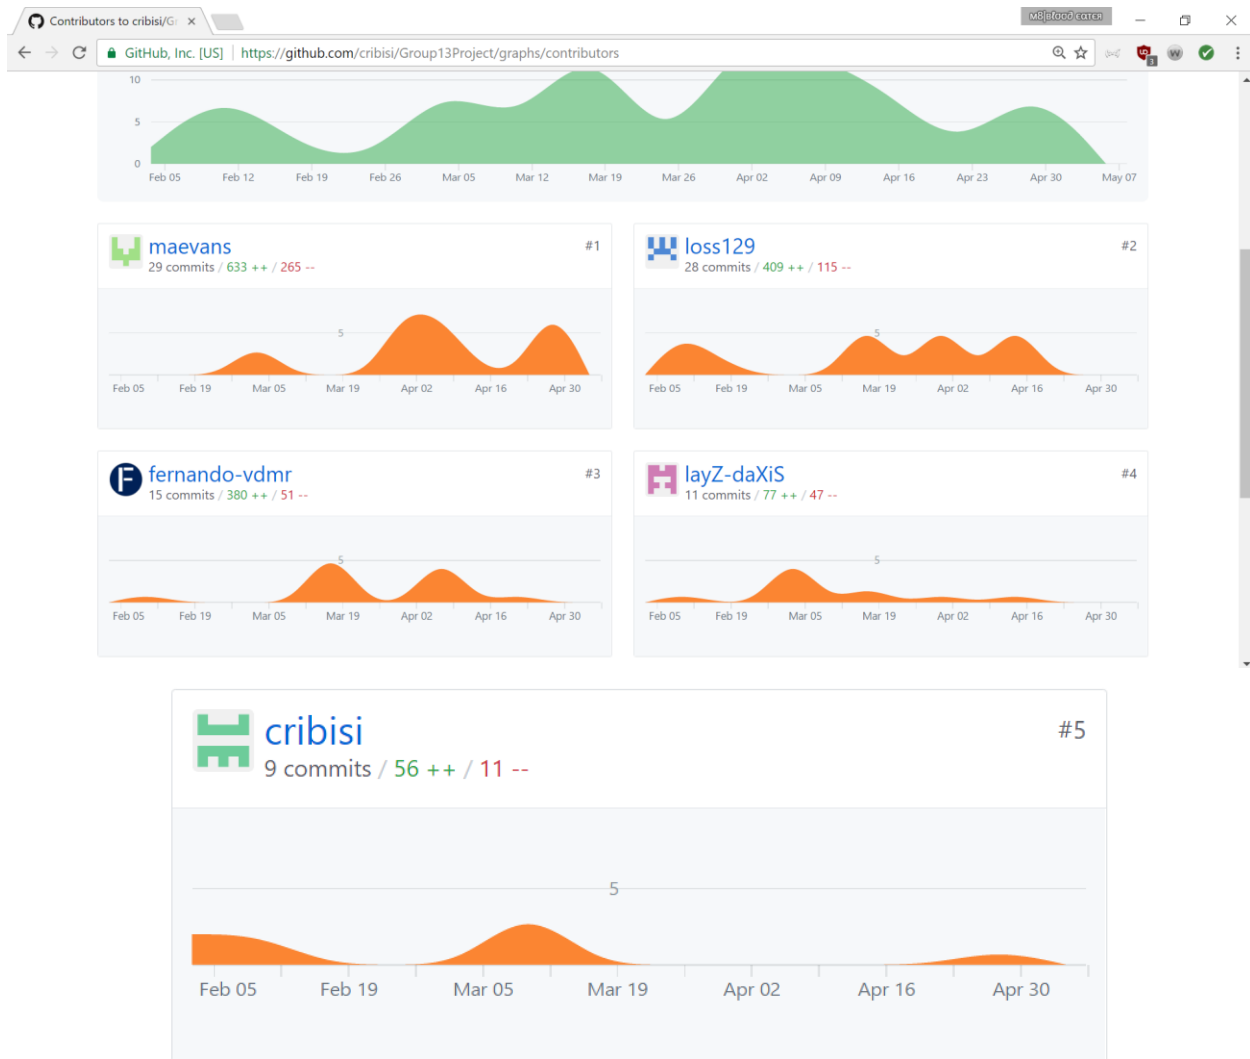

VCS: GitHub

<https://github.com/cribisi/Group13Project> : has most of the files, not the repository with final files

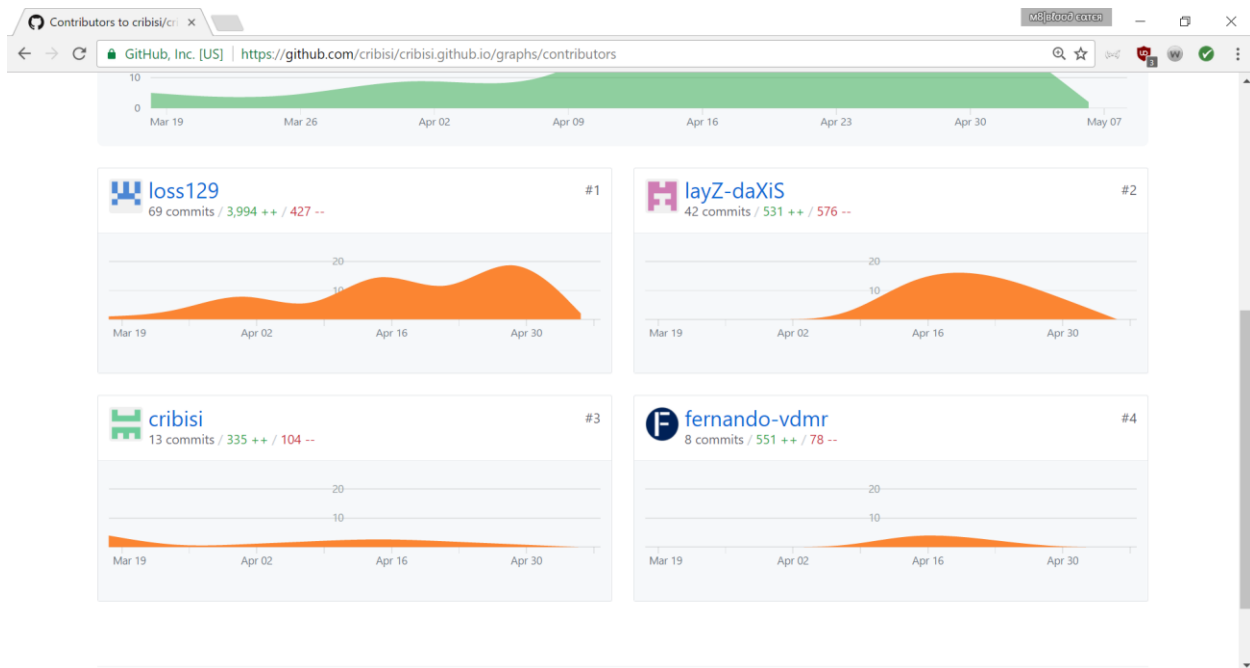

<https://github.com/cribisi/cribisi.github.io> : Treat as our final submission repository as it has all the updated source files and instructions in the readme to get to the website. Also, it was the main repository we used near the end of development.

Screen Shot Contributions: On both repositories

First, the group13 repository

Second, the cribisi.github.io repository:

Corresponding names for user names:

layZ-daXiS: Xi Gao

cribisi: Chad Ribisi

loss129: Lucas Sward

fernando-vdmr: Fernando Mercado

maevans: Mahalia Evans

The `cribisi.github.io` contribution screenshot is not missing any contributors. Maevans made no commits on this repository.

Deployment environment: heroku. To deploy go to Heroku and click hound dogs and say deploy, or go to <https://hound-dogs.herokuapp.com/FrontPage.html>

Repo Structure: All source code for our website

Tests can be found and ran using instructions from TESTING.md in the group 13 repository.
